

Donna Maneva, Facialist & Founder of DOMA

“I discovered youthful, glowing skin has three key elements - hydration, cellular repair and a youthful mindset!”

Facialist Donna Maneva has been practising her high tech, personalised treatments from her Harley Street address for the last 18 years. With decades of experience and a life-long passion for skin health, Donna had strong ambitions to create her own skincare line which merged her Aesthetic treatments with a holistic approach to skin care. Growing up learning from her grandmother who was a well-renowned herbalist in Bulgaria, and having later trained with Obagi techniques and products, she was determined to develop a skincare range that married ancient skincare knowledge with the latest scientific discoveries.

Donna's mindful quest took her around the world discovering long sought-after skincare secrets, which she applied directly into creating her first cream, **DOMA Longevity Cream** that would tackle key skin concerns such as lack of firmness, wrinkles, dehydration, breakouts and uneven tone and texture. During the development of the range, Donna also consulted top Dermatologists and nutritionists to fully understand and address the challenges faced by ageing skin and how to combat them.

Donna says “ My curiosity took me to places with ancient wisdom and beliefs on how to stay energised and prolong life. I discovered youthful, glowing skin has three key elements - hydration, cellular repair and a youthful mindset! Ageing skin has reduced wound healing capacity and increased water loss as well as having to constantly defend itself against environmental aggressors, however, if we feed the skin specific ingredients, we can unlock the mechanism of self-repairing and kick-start rejuvenation of the skin. Based on science and old traditions we created a comprehensive range of products, which are designed to give all the necessary tools for the skin to perform and stay youthful and healthy”.

Longevity Treatment with facialist Donna Maneva - £118

The exclusive Longevity Treatment was created by Donna Maneva to treat the skin on multiple levels combining elements of various technical facials to co-exist as one, depending on the client's skincare needs at the time. Techniques such as microdermabrasion, High Intensity Focused Ultrasound for lifting and firming, Radio frequency microneedling, Micro current machine and Dermapen can be used as needed, as well as using the DOMA Longevity Cream to support the treatments and maintain results. What makes her Harley Street treatment unique, is that it can change at every appointment booked, allowing her to evaluate and select different techniques and devices to use in order to get the best possible results for her clients.

Longevity Cream is available from
